

Article Title	
Researchers	
Research Question (usually in introduction or abstract)	
Hypothesis (usually in introduction or abstract)	
Findings (perhaps in a section titled "findings" or "results")	
Conclusion (usually a small paragraph at the end)	
Methods (usually a section with lots of tables and figures explaining the data) Decipher to the best of your ability	
Can the methods be generalizable? Have they proven what they set out to prove? What problems do you see with the study? Any holes?
